

Day 47 Task

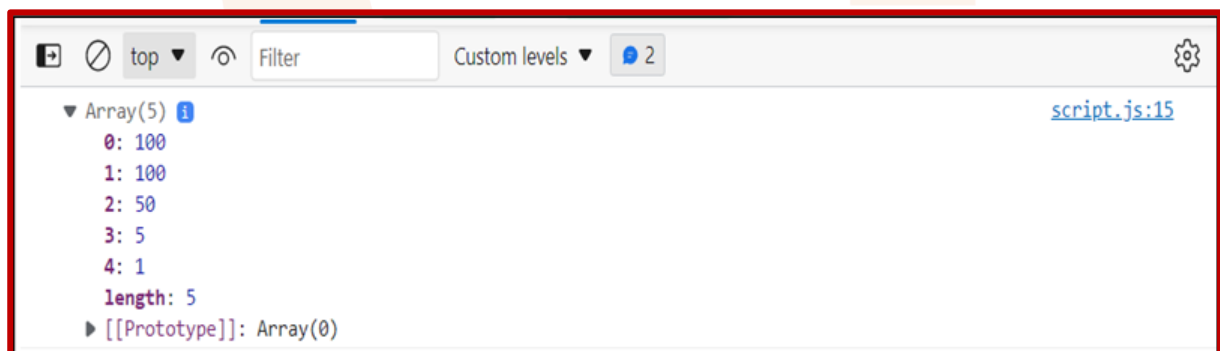

Greedy Method

1. Given n coins of a different denomination and total amount, you need to calculate the smallest number of coins that sums to the total amount given.

Amount: 256

Coins: [1, 5, 10, 25, 50, 100]

The expected output is shown below.

```
▼ Array(5) script.js:15  
  0: 100  
  1: 100  
  2: 50  
  3: 5  
  4: 1  
  length: 5  
  [[Prototype]]: Array(0)
```
