

## Day 35 Task

### Sequential search and Binary search

**Q1.** Create a `linearSearch` function that searches for the value 99 in the given array.

`arr = [256, 32, 187, 56, 4, 99]`

The expected output is shown below.

**Q2.** Create a `binarySearch` function that searches for the value 32 in the given array.

`arr = [4, 32, 56, 99, 187, 256]`

The expected output is shown below.
